

Fire Fighting Equipment - Water Fire Extinguisher

Water is the oldest known method of extinguishing fire, and is still as effective as it ever was! Its use is limited to most burning solids, including wood, paper, textiles and other carbonaceous materials.

It extinguishes the fire by cooling the burning materials below the level of heat required of spontaneous combustion.

This fact has an added benefit in that it helps to prevent flashbacks - this is when although the fire seems to be extinguished, the residual heat is sufficient to re-ignite the fire. This can be a very dangerous side effect and must be closely guarded against when fire fighting. The lesson in this is - **N E V E R** **MAKE ASSUMPTIONS!**

INSTRUCTIONS...

Use on wood, paper, textiles, not liquids or live electricity.

Cools the burning material - direct jet across the base of the fire and keep moving

FOR USE ON CLASS "A"
FIRES ONLY.

TYPE	WATER	WATER
	S/P	C/O
ID Colour Code	RED	RED
Capacity (ltr)	9	9
Fire Rating	21A	21A
Safe for use on	A	A
Height	600	600
Cylinder Diameter	189	189
Overall Width	300	330
Filled Weight (kg)	14.18	14.87
Range of Throw (m)	> 4	> 4
Duration of Discharge (secs)	50	50
Working Pressure (at 20°C)	15 bar	10 bar
Temperature Range (°C)	0 to 60	0 to 60
BS EN3 Approved	YES	YES
MED Approved		YES
